DOCUMENT NAME	Air Pollution Prevention Policy
DOCUMENT No.:	SOP:Envvt:003
VERSION No.:	01

### 1. Policy Statement

VNAI is committed to protecting the environment by minimizing air pollution resulting from our operations. We recognize the importance of maintaining air quality and strive to exceed regulatory requirements. This policy defines our commitment to reduce air pollution through responsible practices, continuous improvement, and collaboration with all stakeholders.

### 2. Compliance with Regulations

VNAI will comply with all local, state, and federal laws and regulations related to air quality. We will monitor and report on our emissions as required by these regulations.

### 3. Emission Reduction Targets

We have establish targets for reducing emissions. These targets will be reviewed regularly and adjusted as necessary to align with our environmental goals. VNAI will invest in technologies and practices that reduce emissions, such as:

- Promoting the use of clean and renewable energy sources
- Implementing energy-efficient technologies and processes.
- Reducing the use of volatile organic compounds (VOCs) in our manufacturing processes.
- Enhancing pollution and odour control systems and technologies.

### 4. Emission Control Technologies

We will continually evaluate and implement state-of-the-art emission control technologies and best practices in our operations. This includes regular maintenance and upgrades of equipment and systems to minimize emissions.

### 5. Employee Training

VNAI will provide comprehensive training to employees to ensure they are aware of our air pollution policies and practices. Employees will be encouraged to actively participate in achieving emission reduction targets and minimizing air pollution in their daily activities.

## **6. Waste Management**

Proper waste management is essential to prevent air pollution. VNAI will manage and dispose of hazardous waste responsibly, following all relevant regulations. We will also promote recycling and waste reduction wherever possible.

## **7. Supply Chain and Vendors**

We will collaborate with suppliers and vendors to ensure they share our commitment to sustainable and environmentally responsible practices. We will consider the environmental impact of the products and materials we source.

## **8. Public Reporting**

VNAI will be transparent about our efforts to reduce air pollution. We will regularly publish reports on our progress, compliance with air quality standards, and any initiatives related to improving air quality.

## **9. Continuous Improvement**

We are committed to a culture of continuous improvement in our air pollution mitigation efforts.

## **10. Emergency Response Plan**

VNAI has a comprehensive emergency response plan in place for unexpected incidents that could result in air pollution.

## **11. Stakeholder Engagement**

We will actively engage with local communities, environmental organizations, and other stakeholders to build positive relationships and gain insights into improving air quality and minimizing the impact of our operations.

## **13. Monitoring & Reporting**

VNAI will conduct regular monitoring and reporting to ensure ongoing compliance with the air pollution policy. We will also consider external audits for an unbiased evaluation.

## **14. Legal and Ethical Considerations**

We will ensure that our policy respects all relevant legal and ethical considerations, such as employee rights, privacy, and community interests.

This air pollution policy reflects our commitment to environmental responsibility and air quality improvement. We encourage all employees to embrace this policy and actively contribute to its successful implementation.
